

Warehouse Wizard — Floor Quick Reference

Product
1.27

**IDENTIFY → SCAN → CONFIRM → COMMIT
ONCE**

RECEIVING

1. Warehouse · container · PO
2. Scan/search product; press commit arrow
3. Total → qty/pallet → pallets
4. Expiry · lot · packaging
5. Verify, receive once, print labels

PUT-AWAY

1. Select task; scan pallet
2. Scan exact location or select bay cell
3. Check space, safety, temperature
4. Place pallet; confirm once
5. Verify task cleared

WHOLE-PALLET PICK

1. Travel to assigned cell
2. Scan exact location / bay selection
3. Verify condition + full quantity
4. Scan pallet; confirm highlighted action
5. Stage in directed lane

MOVE / COUNT / CORRECT

- Same warehouse = Location Move
- Cross-warehouse Transfers are temporarily disabled
- Count what you see; submit online
- Correct eligible pallets from Inventory Detail
- Use Inventory Search as the truth check

STOP / ANDON

- Short or missing pallet
- Damage, contamination, expiry
- Unknown barcode
- Full, blocked, unsafe, wrong-temperature cell
- Floor and system disagree
- Device offline

FIVE-STEP RESPONSE

1. Stop; keep stock safe
2. Identify pallet, location, task
3. Verify in Inventory Search
4. Control status + notify supervisor
5. Resume once after correction

Manager Shift Control

Quick Reference

START OF SHIFT

1. Choose warehouse + Dashboard view
2. Review work, people, space, RF
3. Check holds, quarantine, expiry, reorder
4. Assign owners
5. Release finishable work only

END OF SHIFT

1. Reconcile floor with open queues
2. Clear/own receiving and staging backlog
3. Review controlled stock + count variance
4. Assign unresolved logs
5. Leave a safe, explicit handoff

Supervisor response matrix

Condition	Normal controlled response
Unreadable pallet/location label	Verify live identity/structure; reprint the same code.
Wrong bin	Verify history; use a controlled Location Move.
Short quantity	Recount; Hold if disposition unknown; investigate and replan.
Damage/contamination/expiry	Secure; apply justified status with reason; log owner.
Unknown SKU/barcode	Correct product/packaging master data before work.
Offline device	Freeze commit; reconnect; refresh and re-check; post once.

WHERE IS WORK ACCUMULATING? - WHAT IS BLOCKED? - WHO OWNS IT? - WHEN IS IT DUE?

STATUS CHOICE

- **Hold:** review needed, disposition unknown.
- **Quarantine:** quality/expiry/contamination/temperature/customer isolation.
- **Damaged / Missing:** use only after facts support it.
- **Available:** return only after authorized verification.
